TL3 Ultrafiltration System

TL3-KIT

- Manufactured in China
- Hollow fiber membrane filters to 0.025 sub-micron
- Twice the flow rate of comparable UF systems
- Easier to install than RO; requires no tank or drain
- Shut-off valves built into head allow for replacement of filters without turning off the water
- 1/4 turn quick change connections

TL3 Ultrafiltration System No Faucet

TL3-KITNF

No Faucet Included

- Manufactured in China
- Hollow fiber membrane filters to 0.025 sub-micron
- Twice the flow rate of comparable UF systems
- Easier to install than RO; requires no tank or drain
- Shut-off valves built into head allow for replacement of filters without turning off the water
- 1/4 turn quick change connections

K-NPQ1 Quick Change Water Cooler Filter System

K-NPQ1

K-NPQ1-S

w/Scale Inhibitor

- Manufactured in USA
- NP-QCB01PB 1 micron filter for sediment, chlorine taste and odor, cysts, and lead
- Designed for water coolers with cold and/or room temperature water
- To add a scale inhibitor, order the Neo-Pure K-NPQ1-S with NP-QCB01PBS filter cartridge

K-NPQ2 2-Stage Quick Change Water Cooler Filter System

K-NPQ2

K-NPQ2-S

w/Scale Inhibitor

- Manufactured in USA
- NP-QCB01PB 1 micron filter for sediment, chlorine taste and odor, cysts, and lead
- NP-QSED5* 5 micron prefilter
- Designed for water coolers with cold and/or room temperature water
- To add a scale inhibitor, order the Neo-Pure K-NPQ2-S with NP-QCB01PBS filter cartridge and NP-QSED5 prefilter

K-NPDWS Quick Change Drinking Water System

K-NPDWS

- Manufactured in USA (filter and head)
- NP-QCB01PB 1 micron filter for sediment, chlorine taste and odor, cysts, and lead
- Self-contained sealed cartridge reduces potential for introducing bacteria
- Shut-off valve in filter head engages automatically as filter is inserted or removed
- Also available with brushed nickel or chrome faucet

K-NPHWD Quick Change Drinking Water System

K-NPHWD

- Manufactured in USA (filter and head)
- NP-QCB01PBS 1 micron filter for sediment, chlorine taste and odor, cysts, scale and lead
- Self-contained sealed cartridge reduces potential for introducing bacteria
- Shut-off valve in filter head engages automatically as filter is inserted or removed
